What are the minimum hosting requirements needed for a CMS (dynamic, self-managed Content Management System) site

If you already have domain name hosting in place and require the development of a CMS-based site, please check with your ISP that their hosting provides the following minimum requirements. All our Mono Server hosting packages provide this as standard.

Software	Minimum version
PHP	7.4 or greater
MySQL	5.6 or greater
Security	HTTPS support (https:// rather than http://) – recommended but not essential
